1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method for a single user having an allocated bandwidth, classified in class 370, subclass 468.
- II. Claims 11-22, drawn to a method for testing data packets to accept or reject the data packets, classified in class 370, subclass 230.
- III. Claims 23-32, drawn to a system for marking packets with a different color, classified in class 370, subclass 235.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as in a method lacking the system for testing data packets to accept or reject the data packets, and marking packets with a different color. See MPEP § 806.05(d).

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

- (a) the Group I search (Claims 1-10) would require use of search class 370,

subclass 468 (not require for the inventions II and III).

(b) the Group II search (Claims 11-22) would require use of search 370, subclass 230 (not require for the inventions I and III).

(c) the Group III search (Claims 23-32) would require use of search class 370, subclass 235 (not require for the inventions I and II).

4. Information Disclosure Statement filed on 7/7/06 has been considered.
